WASHINGTON.

The sanitary condition of the army is excellent.

The reported skirmish of the 20th gaye some idea of the comparative merits of the needle-gun and Chassepot-rifle, though, owing to the shortness of the affair, the test was not complete. The Prusslans commenced fire at a distarce of 500 meters, and they fell short one hundred metres. The French fired almost simultaneously, and some Prusslans were killed.

The Press Restrictions.

Minister Olliver informed a representative of the press yesterday that the Government will place no restrictions on the publication of reports of accomplished facts.

The Secret Treaty.

He said the Emperon ever approved or accepted the basis of the so-called secret treaty, alleged to have been drawn up by Count Beneditti, and that Bismarch's promoting idea was actually odious to him.

THE NATHAN MURDER.

New York, July 31 — The Nathan murder remains a mystery. Many people seem to believe that a son of the victim is the criminal, while another theory is that the murdered banker was followed from Morristown, New Jersey, by an unknown man, who concealed himself in the house for the purpose of robery. It is probable. No real clue to the affair is yet in the possession of the police, THE RUSH CATHOLICS

A few weeks ago there existed among Democrats a general feeling of indifference bout our city election. Since the nomi nation of a Radical ticket there has been a spirited but by no means a hot or bitter canvass. Our readers are aware that we have held the record and tendencies of the Radical party up for legitimate criticism; but have in no instance assailed the individual candidates or treated them with discourtesy. There has of course been the ours of the night in the open streets of a city. That rowdies have once or twice aken advantage of the darkness to cry a truth which we must admit with sorrow. But an occurrence so common in all the cities of the Union, and which has been witnessed here for years in all our local contests without being followed by any

violence at the polls, should not induce

any one to anticipate a disturbance at the We ask pardon if we wrong our opponents, but their interest in making an outcry about violence by anticipation, and even provoking it by way of accounting for a small vote and producing other ettects abroad, was so obvious that no one has been surprised at the utter absence of all public manifestations that might justiwill be obstructed or disturbed at the polls to-day. The reputation of our city cannot be damaged without serious loss to the immense majority of business men and property owners who are Demcrats. This sideration, if they felt no better motive, would secure the most effectual precautions upon the part of our Democratic city government, and the active co-opera-tion of citizens in maintaining the peace. tion of citizens in maintaining the peace.

We have already alluded to the threatening and purposely offensive tone adopted by the Radicals in the pending contest. The hectoring manner in which the Radical organ announced the arrival of several companies of soldiery in this city, makes it proper to recall the memory of certain facts which ought to tonch the hearts of our people and zerve them to new efforts for the preservation of our State.

the dominion of a Radical eligarchy?

They have ruled all the States south of us with allen laws enforced by the armed instruments of despotism. They have distranchised their own kindred and countrymen, joint heirs with themselves of all that is great and glorious in American history. They return even fet to give rest ame peace or allow the semblance of self-government to a people prostrated by war, and compelled during five years of secalled peace to submit to all the outrageous munits and exactions of plunderers ruling by the right of bayonet elections. In North Carolina Gov. Holden controls the August election by covering the State with militia commanded by the infamous Kirk. Hundreds of cititions are held under military guard awaiting trial by courtmartial, and the writs of heleas coryse is such by the Radical Chief Justice are spurned with contempt. To sid this monstrous mockery of civilized government, panies of artillery to report to Holden's native with the states are preparing to carry out a similar programme to hold those States as his personal domain and to bring into the next Radical convention enough of his own a creatures to secure his renomination.

The same fate is preparing for Kentucky.

Our opponents know that they cannot control her by the peaceful agency of a free election, and therefore all their acts and movements are arranged with reference to the harsh and oppressive measures by which they overswe and overthrow the will of the people in other Southern States. Gen. Halleck being a soldier who cannot be used in such enterprises, they have brought Gen. Trans here to assume command at this point, and to use the military as he did in Georgia, to promote the President's political designs. The special correspondent of the New York Tribune, a Radical paper, predicted early in May the very state of things we now witoess in North Carolina, and see in course of preparation is other leads to the coal, stone, and timber and visiding wells, coal, stone, and timber and visiding.

We have witnessed the efforts to get up Kuklux excitements in this State; the in-Kukux excitements in this State; the in-cendiary appeals, the bullying and offen-sive tone of the Radical organ, pretend-ing that the Democrats were exhibiting an intolerant and mobocratic spirit, when, in truth, they have been so calm as to seem utterly indifferent, while Rad-ical crowds have gone howling through the streets at midnight. This anxiety of the Radicals to provoke a conanxiety of the Radicals to provoke a con-flict of races, coupled with the sudden transfer of the Georgia satrap to the com-mand at this poul, should be enough to warn our people that the vote at the pres-ent election will determine the policy of the Administration toward Kentucky. It through the indifference of our Demo-cratic friends the Conservative majority should be so largely cut down as to render such a project hopeful, we shall see all the baleful preliminaries of Radical recon-struction begun in this State and urged

These natural sources of wealth and all their desirable products will contribute to the prosperity and wealth of all classes of our citizens. Considering the importance of the enter-prise, in its relations to our local interests, it is proper that the members of our Gen-eral Council should act wisely and judiciously, at their next meeting, when they will be called upon to elect four directors to represent the city's stock in the board None but men of experience, acknowledge

ability, and of known devotion to the we tare of the city should be selected. A Daniel Come to Judgment. The Richmond Enquirer is the organ of the Old-line Democratic party in Viror the Old-me Democratic party in Vir-ginia and represents at this time that sec-tion of the conservative elements in the Old Dominion which clings most tens-ciously to old associated organism, titles and alignments. Its opinions may there-iore have some weight with those red-hot resultemen who, in their eager effort to gentlemen who, in their eager effort to enstruct a white man's party, do not construct a warter man a party of the hesitate to question the Democracy of the Courses-Journal because it is opposed to a war of races and believes in making as

COURTER-JOHERAL BECAUSE It is opposed to a war of races and believes in making as much out of a bad bargain as possible. The Enquirer of last Tuesday says:

A new element has been introduced in the political aysism of Firginia. It is the pepulation of African decent—the best population, mentally and physically, which can be found of that race cloudy introduced to political control anywhere in the world, it can be done in First and an irreversible isci. Our first great duty to ourselves and to here its a fixed and irreversible isci. Our first great duty to ourselves and to here its a fixed and irreversible isci. Our first great duty to ourselves and to here its a fixed and irreversible isci. Our first great duty to ourselves and to here its a fixed and irreversible isci. Our first great duty to ourselves and to here its earnage so that their power to be applied to the smallest injury to the Virginian nod; politic. We must look shead, not so hold us. We misst seak to elevate this race to a position if for asciciation with the grant of of Virginian race; in the control of the country. If the followed people there will always be found men enough among us—native or imported—to join them and give them show. To elevate them above such infractions paired. This can be done chelly by two labor, and give inbors chance to care a livelihaced by honest labor. When these two thrust are accomplished, we may hope to see the Virginia recein assume and maintain his accusatomed cuper: rify over all others of his race on this country may have a hope in hum.

Radical Peace and Liberty. Read the New York Herald's correspondence, which we publish in another electioneering machinery which the Radi-cals use where they have the power. They are hanging the best citizens in North Carolins to extort confessions, and trying them by drum-head court-martial to lish a pretext for this outrageous a sault upon free elections. The Radica President smokes his cigar at Long Branch in luxurious indolence and does not trouble himself with the matter, further than may be necessary to forward troops to back up his man HOLDEN in a murderous foray up his man HOLDEN in a murderous foray up-on an unresisting people. Men of Louis-ville, we are free to-day if General TERRY and his Georgia troops have arrived! Let us vote against these practices while we can. This is no time to sue for Radical favor and many by Addalace. favor and mercy by dodging and voting for "independents." Stand square up to the issue! Vote the straight Democratic ticket, and thus, while you may, give one more vote for law and order, and peaceful

ell-government in old Kentucky! The Detroit Free Press is mistake saying that "a heated di raging between the New York and Louis-ville press as to whether a painting which A.T. Stewart paid \$20,000 for is superior to the panel paining on a Louisville on nibus or not." There was no discussion about it. We presented the panel of the omnibus as the superior of STEWART'S painting as a work of art—all good judges accepted it as such—and that was the end

The Philadelphia Inquirer says: "If on MOLTRE be wise, his policy should be to retire and concentrate until his masses in hand would enable him to strike with decision." It is absolutely astonish ing that a friend of Prussia should conc such valuable information in the colum of a comparatively obscure newspaper in stead of telegraphing it direct to Bar MOLTKE OF COURT BISMARCK.

The Detroit Free Press declar that "every action of the Administration from the least to the greatest, seems to b stimulated either by partisan hatred, o through a hope of securing partisan ends. Our contemporary should remember tha in the perpetration of bad actions, mer imes stimulated not more by mean motives than mean whisky.

The Philadelphia Inquirer has n confidence in Capt. Hall's expedition of the North Pole. It thinks that Hall will succeed merely in "leaving his bone to bleach among the everlasting region of ice and snow." If he should accom plish even that much, we, for one, shall be quite satisfied with the result.

The Life Sustaining Principle.

The vital and the muscular systems are entirely distinct from each other. A man may have the brown of a Hereniae, but it he is descinnt in vital energy he will not wear as well, or last as iong or be as healthy and happy while he does last, as the man of ordinary, or awas issender build, who possesses a larger share of this animating principle. AQUATIC SPORT.

The Grees Double Scall.

On Saturday afternoon the city wharf was thronged with people who witnessed the great deable scall boat race between the "Carrie," manned by Mesars, Sitnesse and Williams, and the "Morrie McDonald," rowed by Mesars, Mulbaliane and Wolf. The race was run for a stake of \$1,000 over the Leutwille course. The distance was three miles, and the race was won by the "Carrie." The men were dressed to clothing of high material and of resy fit, and wore bate with unusually broad brims and abirts of different colors. After they were seated in their books, a practice of a few moments was allowed, when the umpire, Capt. Jac. Douthertry, who was all was ready, and the respective hoest took their places withen, and wurm they resched the foot of Fourth street the sizenal of a fair start was given and the race begin.

After the contenting boats had reached the foot of Second street, the content began to grow warm among the friends of both parties on the shore, and bette of two to one were freely offered on either of the boats, and were just as freedy taken. At the foot of Flory three the friends of the "Carrie" seemed to be very enthusiastic, as the men appeared to be holding out better, and the strokes were so even that they could not think of giving up their beiled that the "Carrie" would wio, and they offered to raise their bets to three to one. THE CUTSIDE AMERICADE.

As early as 5 o'clock in the afternoon, a crowd of the "unwashed and uninvited" cacircled the premises, peering withtilly at the inner and outer scenes that were being prescribted. There was a little too unbe of coarse impudence displayed, interference with which on the part of the police might have established a useful precedent for the future. Carriages came and west in rapid succession, and it ecomed as if one-half the business men in town turned out of their way to catch a glimpee in passing of the scene of feativity.

THE BRIDE'S MOME.

The residence of Mr. H. H. Honore, the father of the bride, is at No. 157 Michagas avenue, corner of Adams street. The house is comfortable and espacious, the unusually large half and supple drawing rooms affording vide scope for social feativities. Opening from the half, and in these with it, the cluing-room appears, located admirably for such a contracted more conveniently for a party or wedding. The furniture and adornments are plain and tasteful, there being nothing like ostentations display.

A QUEFT WENDING.

IN CONCLUSION.

The furniture and adominents are plain and tasteful, there being solthing like octentations display.

A QUIET WEDDING.

It was the purpose of the family to have a simple, quiet wedding. To this end they contined the invitations to the ceremony strictly to the relatives and most intinante family friends. At the time the nupritais were soltenized to the continuent of the parties interested. There was no nunecessary display of any kind.

The most collectable feature in the unpre-tensive adornment was the flowers. The protigality with which the rarest bads and plossoms were scattered about was very marked. On contening the main hall the eye fell upon a superb pyramid of exquisite flowers, prominent among which were the event beautiful Japan lilies. Between the front windows was a most elegant basket of roses, fuchsias, artuitalons, and pinks, in the center of which a bird stood looking down upon her nest and eiger, which were conningly concealed and the fragrant profusion. On all the mantels, the the was the same floral wealth. This made the house cheery and bright, and flooded it with delicious odors. For these designs and this lasterial display, Messrs. Relaig & Gordon have the credit. The latter filled the orders of Mr. Palmer.

THE INVITATIONS. Although it was intended at the outset that the reception should be confined to family friends, it grew into considerable proportions at the last, so that some seven hundred invitations were leased. The cards were plain and tasteful—the work of Freeman.

tations were issued. The cards were plain and tasteful—the work of Freeman.

The bride of the evening is too well known in Chicago social circles to require much additional remark. For a long time she has been one of the reigning belies of Chicago, held in and heart as for her regal beauty. She is a dark-hatres blonde of the Boatty. She is a dark-hatres blonde of the Boatty. She is a dark-hatres blonde of the Southern type, with eyes that look out sunnily and inward thoughtfully. Of rare modesty and queenly grace, she is fitted to bonor the proudest home and the proudest name is all the isnd. Mr. Cogswell, the artist, has just completed a very fine portrait of Miss Honore. It hong when the Criwing-room wals on his evening, the completed a very fine portrait of Miss Honore. It has trait is what artists designate as a "three-quarters size." The dress is a modest and laspeint salmon-colored silk, with a lace time, looped up on both sides. In the lady's haads, clasped in front, is a sprig of fusch-siae. In the background are the sky and a flower garden.

Miss Honore's reputation is not a matter of local pride alone. It has been her fortune to pass a great deal of time in Eastern cities, among the most beautiful, fashionable, and scomplished. Here have been dealered by the public remark, so that the event which we are now recording is looked upon with interest in many social circles oassade of Chicago. In the few days which will intervene before she leaves for Europe, many of her New York friends will no doubt improve the opportunity to lock upon ber as a bride.

Mr. Politer Palmer, the fortunate man who

to look upon her as a bride.

Mr. Fotter Falmer, the fortunate man who carries away so great a prize, looked young and happy on last evening. He was dressed in simple evening dress, and wore no jewels. He has made his supposed militions since he came to Chicago, and is yet hardly turned 40 years of age. Of his prospective achievements in the way of hotels and a probable paistial residence, we will leave to time and imagination. All will hope that no cloud may ever come over the fair promise of today.

IN GENERAL,
we should say of this wedding that it was precisely what shr. and Mrs. Honore deared it to
be-a quiet, redued, unostentations affair.
There was nothing about it that could be construed into lack of good sense or good judgment. On the other hand, it was planned
and conducted with a notable regard for the

Ea? The editor of the Sedalia Times reports having recently seen a remarkable meteor, which appeared between 2 and 3 s. m. He says: "A little north of east and about twenty degrees above the horizon, there bung a faming ball of dazzling brightness of the appearent size of a hat crown. It shone with a yellowish corruscating, light, and sont forth brilliant points or rays in all directions. The great marvel was its perfect fixedness; for it did not shoot like an ordinary meteor, ner change its place a particle. At intervals of two or three minutes a portion of the faming ashere would seem to descend a little, as If it were a molten mass, when it would draw back again. We watched it with the greatest interest and wonder for about half an hour, when it began dwonder for about half an hour, when it began dwonder for about half an hour, when it began dwonder for about half an hour, when it began do grow smaller without changing position. It gradually diminished it size till it became as small as a star, then a mere speck, and item vanished altogether, and left not a track behind."
